Revealing Project X

Next generation technology addressing the 'social dilemma' to be revealed in livestream on Saturday January 16 - supported by prominent independent media figures and technical experts

While we are all seemingly wedded to our social media, discontent with its dark side is at an all-time high - many users distrust the platforms and feel betrayed and disempowered as their data is sold and content manipulated. Trust can only be restored when users regain control, their privacy is respected and there is confidence and transparency in communications.

Pulitzer Prize winning investigative journalist and project advocate Chris Hedges said "The digital platforms that disseminate our information and communications have imposed a slew of algorithms to shut us out. We must build our own social media platforms or prepare to be censored and silenced." It is time for a change.

Talk Liberation is excited to announce the launch event of a cutting edge, next generation product "Project X." The launch event and product reveal will be live-streamed on **Saturday January 16th at 5pm EST US** on YouTube, BitChute and Facebook Live.

Project co-founder Suzie Dawson said "I'm thrilled to be able to reveal a half year's work undertaken with the best and brightest minds I know to bring an end to our communal reliance on corporations who act as a filter between us and our friends and followers. At this event we will unveil our plan to take our digital future back and talk liberation."

The launch event will feature a renowned panel of guests including Dawson, journalist Chris Hedges, ex NSA Technical Director Bill Binney, comedians Graham Elwood, Jimmy Dore and Lee Camp and a special message from Christine Assange, mother of WikiLeaks publisher Julian Assange, among other surprise guests.

This event will launch a new direction and bring like minded people together to reclaim their rights to open communication by

- a) joining a community dedicated to the successful delivery of a product which will contain powerful, next generation messaging technology
- b) crowdfunding to contribute to the product development and
- c) spreading the word that things can and will be different

With outdated, corrupt legacy platforms becoming obsolete, algorithm by algorithm, we offer a solution.

Call to Action

Attend the launch by bookmarking talkliberation.com which features an event countdown timer and live tweet using the hashtag [#talkliberation](https://twitter.com/talkliberation).
