Panquake Delivery Funded!

Join The Team to Celebrate and Discuss Next Steps

[Panquake](#) is a new crowdfunded social media platform that protects user privacy and freedom of speech. Early-stage development was supported by over 3,700 small donors. Today, Panquake are thrilled to announce that the community have pulled together to raise the required funding to complete Panquake's third and final crowdfunding round **guaranteeing the delivery of this highly sought-after next generation communications technology.**

Panquake Founder and Chief Product Officer Suzie Dawson said: "A little over eighteen months ago, Panquake was just an idea. Now thanks to the faith placed in us by thousands of supporters, the product is a reality and hurtling towards release. Trusted longstanding members of our community have stepped forward to help push our campaign over its target and now we have the resources we need to complete our blockchain and network build, hire and train the support teams, that will deliver a top-notch service and social media experience to citizens the world over. You did it!"

In recent months Panquake has released multiple short videos of its functioning interface, on both mobile and web, and demonstrated cutting edge implementations of privacy features not found in any other application.

Panquake's unique model and technology has been presented at conferences at Curtin University in Australia and Yale University's Privacy Lab in Connecticut, USA. This increased visibility has provided demonstrable proofs of concept for the Panquake community, who will be the first users of Panquake's Beta release.

Panquake Brand Ambassador, John Kiriakou, said "Panquake is the real deal. This is a platform for everybody who cares about transparency, data privacy and integrity. That's why it's been so successful in its early stages. Panquake is something that everybody should want to be in. It's the future of social media."

Panquake has already faced and overcome myriad challenges, both technical and from establishment forces that fear such an innovation.

Panquake Chief Security Advisor, Sean O'Brien said: "It's absolutely amazing to see the Panquake team build so quickly, with such a high level of quality and while following professional standards and software development best practice. Panquake's supporters will be rewarded with an amazing UI that lives up to promises, and detractors will have to face the fact that Panquake is coming -- Panquake works and is getting better each day."

Now, the Panquake team have released an official event video on a variety of channels, featuring Panquake executives and public endorsers celebrating this milestone and discussing what the completion of Phase 3 of the crowdfunding campaign means for the project. Details regarding next steps for the wider community are also discussed.

BACKGROUND ON Panquake:

In 2021 alone, over 2 million people visited the PANQUAKE.com website and over 3,700 donors contributed funds towards the development of the next generation social media technology. Panquake's unique blockchain technology allows users to amplify their messages without losing their rights to privacy. In a series of 20 consecutive monthly public delivery meetings, Panquake's build achieved and transparently reported a series of major milestones to the public, from network design proof of concept to build advancements and the look and feel of its functioning prototype interface.

Members of the public have flocked to apply to become PANQUAKE BETA users and Panquake has announced its intention to keep applications open up until delivery.

Visitors to Panquake.com are

a) joining a community dedicated to the delivery of a product which will bring next generation solutions to a market that is hungry for change

b) supporting a next generation, privacy-focused social media solution at https://panquake.com/donate and

c) spreading the word that things can and will be different. With Big Tech algorithms, AI moderation and massive data breaches

rendering outdated, monopoly platforms obsolete, **Panquake offers a vital and timely solution.**
