Top Privacy Advocates Headed to Mexico for Monerotopia Conference

*"This moment is too important to stay safe in silence" Panquake Founder, Suzie Dawson, posts a cryptic **message** ahead of her keynote session on this Sunday, at the <ins>Monerotopia 2023</ins> conference in, Mexico.*

Renowned privacy blockchain project, Monero, is hosting its 2023 conference, **Monerotopia**, at *Huerto Roma Verde* in the heart of Mexico City this weekend.

Monerotopia will feature workshops given by leading technologists and professionals in the privacy and blockchain space. Keynote speakers include the VP of Cake Wallet, Justin Ehernhofer, The Dollar Vigilante, Jeff Berwick, and host of Opt Out podcast, Seth for Privacy.

One of this year's keynote speakers is Suzie Dawson, founder of privacy social media company, <ins>Panquake</ins>. Her session is titled '<ins>PANQUAKE: Baking Human Rights Into Next Gen Blockchain Tech</ins>'

Social media users are speculating on what Panquake might have in store at Monerotopia. Given the title of the talk it's safe to assume that privacy is one

of the key themes, but there's mounting interest in hearing what Dawson and Panquake will be revealing in this keynote session.

Monerotopia has come at a key moment in time, with online censorship and deplatforming being heavily propagated by governments worldwide, in an attempt to control the dialogue and in many cases to distort the truth. Monerotopia is one of the key events that draws people from all over the globe seeking solutions to protect these burgeoning threats to human rights.

Digital sovereignty and personal autonomy are the foundations that Panquake is built on. The team at Panquake created this next generation platform precisely to counter the corporate-state alliance, that is now being accelerated by the increasing influence of AI tools.

Panquake Chief Security Advisor, Sean O'Brien, appeared on Monero Talk with host, Douglas Tuman, last month for an in depth and enlightening discussion. Sean and Douglas talked in great length about where social media is headed as privacy technology continues to advance, and the critical role Panquake will play in the near future.

O'Brien on discussing surveillance capitalism on Monero Talk said: "If you don't have privacy, you can't have speech. You're going to be surveilled by not just police state. You're going to be surveilled by the networks that you're in, by corporate giants and so on and so forth."

Monerotopia kicks off day two today and continues through Sunday, 7 May.

The Panquake team will be exhibiting at the conference, with Dawson set to speak at Sunday, 7 May, at 1:25pm EST.

Attendees using Monerotopia's code PANQUAKE will receive a 10% discount off the ticket purchase price!

About Panquake

Panquake is the social media platform with a difference, that allows user to amplify their message, without giving up their rights to privacy. Panquake is a groundbreaking crowd-funded social media platform, where the users are the customers and not the product. In over a little more than a year, Panquake's build has achieved a series of major milestones, from network design proof of concept to a functioning prototype interface. In October 2022

Panquake reached its funding goal, for delivery of its BETA offering. Thousands of people have flocked to [apply to become Panquake BETA users.](#)

Visitors to [Panquake.com](#) are:

- joining a community dedicated to the delivery of a product which will bring next generation solutions to a market that is hungry for change,

- successfully crowdfunding to contribute to the product development at [Panquake.com/donate](#), and

- spreading the word that things can and will be different.

With Big Tech algorithms, AI moderation and massive data breaches rendering outdated, monopoly platforms obsolete, Panquake offers a vital and timely solution.
