Panquake Goes Parabolic: Parent Company Talk Liberation Publishes Impressive Annual Performance Metrics

Independent software development house [Talk Liberation](#)'s 2025 Development Report today revealed **308% growth** for its development division, who are working on people-powered social network new entrant [Panquake](#) and privacy-focused digital marketing dashboard [Lnqk Me](#).

The success of the company has been fuelled by an unwavering commitment to architecting AI-free commercial-grade software with respect for human rights baked in at the foundation.

Suzie Dawson, Talk Liberation and Panquake founder said "Talk Liberation is all about going back to the future. We are creating cutting edge and modern software applications using foundational development tools, practices and methods from the dawn of the internet. The time before the normalisation of pervasive commercial surveillance. The time when privacy still existed. In order to resurrect that for future generations to experience and enjoy, we have to ensure that at every layer of our application, there exists nothing that could spy on you, exploit you or exfiltrate your data. It is no small challenge - but it is one we are provably realising."

It is remarkable in this day and age to see a technology company soar without the use of AI, Big Tech platforms, or workplace surveillance tools. The report serves as a powerful testament to our company's core belief: that businesses can be wildly successful without violating the human rights or privacy of their staff and users—especially when the majority of companies have become worryingly dependent on what many are speculating may be an artificial intelligence bubble that could burst at any time.

In an era of increasing digital surveillance, Talk Liberation stands as a beacon of rare transparency, proving that ethical technology and exponential growth are not mutually exclusive. The reported surge in productivity is coupled by a 185% increase in the development team's size in 2025 alone.

Key Highlights from Talk Liberation's 2025 Development Report:

- **Parabolic Growth for Panquake:** The flagship social network has completed its Test Net phase and is now on "Panquake Lite" - with real users posting real content, in real time. Development is advancing rapidly toward the highly anticipated Panquake Beta release.
- **Lnqk Me Goes Mobile:** The ethical digital marketing dashboard, Lnqk Me, has successfully built and deployed native iOS and Android applications, a major milestone that underscores our growing technical sophistication and dedication.
- **Exponential Code Production & Productivity Gains:** The development team more than tripled its net lines of code from the previous year, while also slashing lead times by 30-60%, demonstrating significant improvement in process effectiveness and team maturity.
- **A Thriving, Human-Centric Workplace:** This record-breaking growth was accomplished without any AI-driven productivity monitoring or workplace spying, affirming that trust and respect are powerful drivers of innovation.
- The report also highlights the advanced development of the custom Panquake blockchain, designed not for financial transactions, but to provide users with transparent, cryptographically secured, and tamper-proof network metrics.

Ready for Market - and for Strategic Partnerships

With the successful builds of Panquake Lite and Lnqk Me, Talk Liberation is now poised to go to market. The company is officially opening its doors for strategic partnerships with brave, forward-thinking organizations and individuals who are equally committed to delivering genuine, authentic privacy solutions to the world. Those who feel strategically aligned with the company are welcomed to reach out by email at contact@talkliberation.com

Talk Liberation also issued a heartfelt thank you to the thousands of [crowdfunding backers](#) and supporters worldwide whose belief and support helped to make this journey possible. At the conclusion of the report, the company wrote: "In honour of you, we never forget our promises to you. The products we build enshrine the ethics that attracted you to us from the beginning."

BACKGROUND ON Talk Liberation:

'This is about people, not machines.' So begins the About Us page of Talk Liberation's [official website](#). Talk Liberation is a next generation software development house driven by the ethos that we all have a right to retain our privacy and control over our own data while participating in online communities, and that as individuals, our personal details are not for sale or to be extorted in return for the 'privilege' of using software platforms.

Just a few short years ago Talk Liberation started out as a group of volunteers and IT nerds frustrated at how Big Tech was abusing our data and using social media to turn us from customers into commodities. The company now has scores of talented team members working in more than a dozen countries on a variety of software projects at various stages of design, development, testing and delivery. Panquake is Talk Liberation's flagship project.

BACKGROUND ON Panquake:

To date, over 3 million people have visited the [Panquake.com](#) website and over 3,800 donors [contributed funds](#) towards the development of the next generation social media technology.

Since Panquake first discussed a groundbreaking idea of a crowd-funded social media application where the users are the customers – not the product – Panquake's build has achieved a series of major milestones, from network design proof of concept to a fully-functioning application interface.

Members of the public have flocked to [apply to become Panquake BETA users](#) and Panquake is in its final build phase in order to launch the BETA offering.

With Big Tech algorithms, AI moderation and massive data breaches rendering outdated, monopoly platforms obsolete, Panquake offers a vital and timely solution.
